

# Divyanshu Pabia

Software Engineer

 thedivyanshupabia.com  Rekklessss

## Summary

---

I build software, learn in public, and use this site to share projects, writing, and experiments.

## Projects

---

### Personal Website

A portfolio and blog built with Jekyll, deployed to AWS EC2, and served from a custom domain.

- Custom domain at thedivyanshupabia.com
- Automated production deploys from GitHub Actions to EC2
- Local Docker preview plus simple content scaffolds for posts and projects

## Skills

---

**Focus Areas:** Software engineering, AI tooling, web development, cloud deployment, technical writing

## Interests

---

**Currently Exploring:** AI products, developer tools, distributed systems, personal websites, learning in public
